

POP®

MCS5800 Rivet Tool

***Portable and Rechargeable
Wherever You Need it!***

The POP® MCS5800 tool brings powerful blind rivet setting performance wherever it's needed. The high-capacity battery pack has the endurance to set up to 1900 rivets – and can then be recharged in just an hour.

The MCS5800 is ideal for site and maintenance work, but it also expands options on the production line. Blind rivets can be installed at assembly stations with no convenient power supply, even alongside a moving line or where the application makes access with a pneumatic power line impossible.

POP® MCS5800 is the perfect, portable rivet tool for use anywhere.

Features & Benefits:

- Tough and solid; built to withstand industrial conditions
- Easy to use, well balanced and comfortable
Integral mandrel collector
- Instant return to start position after rivet setting, saving energy and increasing productivity

MCS5800 Specifications

Sets: 3/32" – 3/16" (2.4 - 4.8mm) diameter POP blind rivets in all materials

Weight: 4.8 lbs (2.2kg)

Stroke: 0.787" (20mm)

Power: Built-in, rechargeable 12 volt battery

Recharge: 1 hour

MCS5800 Kit includes:

Four (4) interchangeable nosepieces, nosepiece wrench, battery, battery charger and steel carrying case.

The high-capacity battery pack has the endurance to set up to 1900 rivets depending upon rivet size and material.

Note: Hold the rivet in the nosepiece in certain applications, eg., in a vertical operation, the use of special retaining nosepieces is recommended. These can be ordered separately.

Reorder Part Numbers:

Battery: MCS5800-40

Battery Charger: MCS5800-45
